2026 Drug Formulary & Pharmacy Benefit Guidelines

Prescription Drug Benefits

The following is a comprehensive listing by drug class of formulary medications approved under the SummaCare Prescription Drug Benefit. Brand name drugs are capitalized and generic drugs are listed in lower case. SummaCare tiered prescription drug benefits are generic-based. Prescription drug benefits vary, but in most cases, brand name medications that have a generic equivalent require the patient to pay a Tier 3 copay or the difference in cost between the brand and generic medication. Some benefits may exclude certain drugs on this list. Refer to your Prescription Drug Benefit Rider or plan documents for more coverage information.

About Tiers

SummaCare members pay a Tier 1 copay for most generic drugs and selected over-the-counter drugs. Members pay a Tier 2 copay for higher cost generic drugs and preferred brand name drugs. Members pay a Tier 3 copay for non-preferred brand name drugs. Note: Some benefits may require a deductible be met before copays apply and/or have a Tier 4 copay level. Refer to your plan documents for further information.

Over-the-Counter (OTC) Drug Coverage

SummaCare's Prescription Drug Formulary includes selected OTC drugs that are covered when they are presented to a pharmacy with a written prescription.

Using Your Summacare ID Card

It is important to show your SummaCare ID card when filling prescriptions. By showing your SummaCare ID card, safety checks are performed such as drug-drug interactions, therapeutic duplications and dose checks, even if you use multiple pharmacies including mail order.

MedImpact

MedImpact is SummaCare's Pharmacy Benefit Manager and is responsible for processing pharmacy claims for SummaCare members. MedImpact also handles pharmacy benefit customer service and utilization management requests on SummaCare's behalf. To reach MedImpact, members should call the SummaCare customer service number on the back of their ID card.

Pharmacy Utilization Programs

SummaCare's Prescription Drug Benefit incorporates utilization management programs (prior authorization, step therapy and quantity limits). Drugs requiring utilization management are indicated in the "Requirements/Limits" column of the formulary document and will be indicated with PA, QL or ST. If you are prescribed one of these drugs, the prescriber may need to contact MedImpact to provide supporting medical information.

Prior Authorization= PA

Prior authorization requirements are placed on medications when they have limited conditions for which they are prescribed, special monitoring or dispensing requirement or an extremely high cost. Guidelines for approving coverage for prior authorization drugs are developed and approved by a panel of practicing physicians and pharmacists.

Prior Authorization for New Starts Only = PA NSO

If you are a new member, you may be required to get Prior Authorization on particular drugs before you fill your prescription. In this scenario, the same requirements as listed above under Prior Authorization would apply.

StepTherapy = ST

Step Therapy is the practice of initiating drug therapy for a medical condition with the most cost-effective and safest drug and progressing to other more costly or risky therapy, only if necessary (i.e., you must try drug "A" before you can get drug "B"). The goal is to control costs and minimize risks. Step therapy is an automated process. If you present a prescription for a "step therapy" drug (i.e., "B") to a pharmacy, an automated check of your prescription history will occur. If the system finds that you have received the qualifying drug(s) (i.e., "A"), your prescription will be processed. If the system does not find that you received a qualifying drug (i.e., "A") in recent history, a prior authorization will be necessary.

Quantity Limits= QL

When a drug has a Quantity Limit, the amount of medication per prescription is limited to a specified amount per prescription or within a specific time frame. These limitations are usually in place due to safety issues or because the use of a dose higher than what is recommended has been shown to result in minimal additional benefit to the patient.

Summacare has Implemented the following Opioid Edits:

Enhanced Opioid Cumulative Dosing

This limit is based on MME (Morphine Milligram Equivalent), which is the calculated amount of opioids that you are taking per day. Your opioid prescription will deny at the pharmacy if your total MME is greater than 80 MME. This means that you will need to get approval from SummaCare to fill your opioid prescription(s).

Days Supply Limit Edit

If the course of your opioid treatment continues for more than a 90 days then your opioid prescription will deny at the pharmacy. If you need more than a 90 day supply, you will need to get approval from SummaCare to fill your opioid prescription.

Specialty Drugs

Specialty drugs are designated as such because they may require special handling, are expensive and/or special monitoring of the patient receiving the drug may be appropriate. Distribution is often restricted to a Specialty pharmacy. Some benefits may cover these drugs at a higher copay level. Refer to your plan documents for more information. These drugs are indicated by *May have Specialty Costshare.

Employers and Members needing further information regarding the SummaCare prescription drug benefit please refer to the number on the back of your Member ID card or call Group Customer Service at **800.996.8701**. Providers, please call Provider Services at **800.996.8401**. TTY/TDD users should call **800.750.0750**.

Exceptions

If you are prescribed a drug that is not listed on the formulary, you can ask us to make an exception. Your prescriber will need to tell us why making an exception is medically necessary for you. If the exception is approved, this drug will be covered at a predetermined cost-sharing level. Generally, SummaCare will only approve your request for an exception if the alternative drugs included on the formulary would not be as effective in treating your condition and/or would cause you to have adverse medical effects. Your prescriber must submit a supporting statement by completing the Provider Individual and Group MedImpact Medication Request form, which is available on our website at summacare.com, under the Find a Document section. The Medication Request can be sent via phone, mail or fax to:
