

Effective June 1, 2025 - PROVIDER COPY

THIS LIST APPLIES TO ALL MEDICARE MEMBERS

Certain drugs require prior authorization in order to be covered under your health plan. Prior authorization review is the process of determining the medical necessity of a proposed procedure, surgery or treatment (including prescribed drug intervention) relative to approved criteria. Prior authorization is required to ensure that the drug is medically necessary and you will receive the benefits to which you are entitled.

Requests for prior authorization must be received before the services or drugs are provided/ administered. Failure of a network provider to contact SummaCare for required authorization of items covered under your benefit plan will relieve the health plan and you from any financial responsibility for the service if those services are rendered before notifying the plan.

NOTE: Network providers are responsible for obtaining authorization at least 48 hours before administering these prescription drugs. If the provider is not in the plan network, it is the member's responsibility to verify that prior authorization has been obtained.

How to request prior authorization for drugs covered under the medical benefit:

- Fax submission of requests for prior authorization should be used for non-urgent requests.
- Routine requests: Fax 234-231-7082
- Urgent requests: Call 330-996-8710 or 888-996-8710
- Oncology requests: For all drugs marked with "*" Call 855-774-1315
- Pharmacy benefit requests (Rx ONLY): Fax 858-790-7100

IMPORTANT INFORMATION:

1. **This document is not intended to interfere with urgently needed care.** Urgent care is any request for medical care or treatment in which the time periods for SummaCare to make non-urgent care determinations (within 14 days) could result in the following circumstances:
 - Could seriously jeopardize the life or health of the member or the member's ability to regain maximum function, based on a prudent layperson's judgment; or
 - In the opinion of a practitioner with knowledge of the member's medical condition, would subject the member to severe pain that cannot be adequately managed without the care or treatment that is the subject of the request.

If in the judgment of the rendering provider the care is of an emergency or urgent nature, the plan will review for medical necessity after the care has begun.

2. All services, even if authorized, are subject to your benefit plan contract coverage and exclusions, eligibility and network design. Approvals are not a guarantee of coverage, as your benefit plan contract may retroactively terminate at a future date.
